

- _____ 7. When placing a pan on the heating unit, always be sure the handle is extending over the front edge of the range.
-

OVEN

- _____ 1. The oven needs to be preheated for baked goods, 8 - 12 minutes is all that is needed.
- _____ 2. Always pull the oven rack out to remove a hot item.
- _____ 3. Foods are cooked according to time and temperature in the oven.
- _____ 4. Allow at least 5 inches between pans in the oven for air circulation.
- _____ 5. When using two racks, position pans so that one pan is not directly over the other pan.
- _____ 6. For most baking, the oven rack should be positioned close to the top.
- _____ 7. Never lock the oven door when baking.
- _____ 8. When removing hot foods from the oven, use a potholder, apron, towel, dishcloth or whatever is handy.
- _____ 9. In the self cleaning oven, a high temperature burns the spots and spatters into a fine powder, which is then wiped clean.
- _____ 10. A single beep will indicate that the oven is preheated.
